# Claim Rejections - 35 USC § 102

**DETAILED ACTION** 

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Richardson et al. (US 20030156605).

With respect to claim 1, Richardson discloses in Fig. 1 a high power integrated fiber laser amplifier comprising a seed pulse 10 and one or more power amplifier stages comprising a fiber preamplifier 68a/68b receiving and amplifying the seed pulse, said fiber preamplifier having a first core diameter; a fiber power amplifier 96 comprising a low numberical aperture, coiled clad fiber, having a core diameter larger than said first core diameter (paragraphs 0156-0157), means for coupling 132a/132b said fiber preamplifier to sadi fiber power amplifier.

With respect to claim 2, Richardson discloses said low numerical aperture is between 0.06-0.08 (paragraph 0157).

With respect to claim 4, Richardson further discloses first means 78 for pumping the preamplifier, and second means 112 for pumping said fiber power amplifier, and means for synchronizing the seed pulse with said first and second means for pumping to reduce ASE (paragraphs 0031, 0145-0146).

Application/Control Number:

10/581,416 Art Unit: 2828

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Richarson et al. (US Publication No. 2003/0156605) in view of DiGiovanni et al (US Patent No. 5864644).

Richardson discloses the claimed invention except for a tapered fiber bundle. DiGiovanni discloses in Figures 7A-H tapered fiber buddles to connect to the cladding of the fiber amplifier for directing pump energy into the cladding. It would have been obvious to the one having ordinary skill in the art at the time the invention was made to provide the tapered fiber bundle as taught by DiGiovanni to Richardson in order to couple fiber to the fiber amplifier more efficient.

## **Communication Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Nguyen whose telephone number is 571-272-1947. The examiner can normally be reached on 9:00 AM - 6:00 PM, Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MINSUN HARVEY, can be reached on 571-272-1835. The fax phone number for the organization where this application or proceeding is assigned is **571-273-8300**.
